

## Refillable Gas Cylinder Range

Euro-Gas Management Services offers a wide range of cylinder sizes, all of which are an ideal compromise between weight and gas capacity.

Aluminium alloy is the preferred material of construction for our cylinders since it offers a significant weight advantage over steel, and its superior internal finish can be inerted to increase mixture stability.

This table contains the main cylinder options. If you have any other requirements, please do not hesitate to contact us.

Cylinder water capacity (litres)	Cylinder Dimensions (mm)		Gas Capacity - Nominal (Litres)	Cylinder Weight (kg)		Package Weight for Despatch (kg)
