

Low-power type Combustible gas sensor

Features

- Good sensitivity [Fig.1]
- Low power consumption

Specifications

Principle	Catalytic combustion
Model	FC-8
Detectable gas	Combustible gas (Methane etc.)
Detection range	0~100%LEL
Operating temperature	-10°C~40°C
Supply voltage	1.8±0.03V(constant) 92mA(approx.)
